Product short description:

400x1200x810 mm, volume 240 litres

Product description:

The spill retaining tub is welded from quality steelsheet with powdercoated finish, which increases resistance against very agresive substances. Designed to retain spills of substances harming environment or water resources, two barels of 200 litres can be placed on it. The maximum retained volume is 240 litres. Robust construction ensures the possibility of high load and at the same time easy handling with a forklift, as well as a long product life.spill retaining tub je vybavena pozinsteelaným roštem pro zvýšení pracovního komfortu and zároveň navýšení volumeu zachycené látky.
