Product short description:

400x780x780 mm, volume 100 litres

Product description:

The spill retaining tub is welded from quality steel sheet with galvanized finish, which increases resistance against very aggressive substances. Designed to retain spills of substances harming environment or water resources, two barrels of 200 litres can be placed on it. The maximum retained volume is 100 litres. Robust construction ensures the possibility of high load and at the same time easy handling with a forklift, as well as a long product life. The tub is equipped with a galvanized grid increasing handling comfort and volume of retained substance.

Product features:

height mm	400
